

10 DAY SUPPORT PACKAGE

About us

We offer expert quality improvement services through our sister company ALIN. The range of these services have been developed as a result of extensive experience as inspectors and our continuous detailed analysis of inspection reports. Our aim is to provide clients with a customised service tailored to meet your individual needs and support you in continuing to improve the quality of your provision.

Our support packages are designed for those providers who know they need support but cannot easily quantify it into a specific package or short webinars. Some providers prefer to spread support over a longer period of time rather than at a single session. The package comprises of a bank of 10 days that can run concurrently or spread over a number of weeks or months. This approach enables specific support to be put in place then monitored for impact with further refinement after a period of time. Many providers following the initial scoping meeting and support session, realise the root cause of issues may not be what they originally thought, the flexibility of the package means support can be tailored to meet needs as opposed to buying a series of individual packages that may not fully address the long term goal. With a support package providers can amend their requirements as they see the impact of that support on both staff and in learner progress.

How it works

Our highly specialised team will provide you with invaluable insights and coaching on the planning and delivery of successful training programmes.

We offer ten days of specialist advisory support, at a discounted rate for members, over a twelve-month period on projects and training as required.

The support packages are highly flexible and designed in discussion with you. They give the opportunity to build a trusting relationship that allows time for valuable reflection and considered responses to challenges and unplanned events. This longitudinal model is even more effective as evidence of the impacts of interventions accrues.

Our expert team help to define the types and range of evidence that will allow you to make a robust self-assessment of key areas of your provision and the experiences of learners. They will clearly communicate areas of strength and potential areas for improvement and make recommendations as to what you might need to do to improve further the quality of your provision.
